# POLE POSITION™

**ATARI RACING**

Astonishing speed.  
Spectacular thrills.  
New Pole Position™ is unbelievable driving realism that puts you in the driver's seat of a screaming Formula 1 racing machine in an incredible contest of endurance, skill and endurance. Realistic sound effects, new Quattrone Race Factory, 64 difficulty options, a wide variety of bonus options and a Top 300 Score Table are just some of the features that make Pole Position a must-have for high-performance profits. Fast out.

**Pole Position** is high performance racing excitement you thought had vanished. A sizzling, driving experience with all the open wheel competition thrills of Gran Prix racing at the world famous Fuji Speedway.

**The Qualifying Lap.** This exclusive feature provides a new driving challenge not available in any other racing game. Starting lights blink the countdown. The driver touches the throttle. Other cars, signs, landscapes blur as the player is propelled into the most exciting ride of his life. The driver must finish the qualifying lap within 75 seconds to enter the Gran Prix race. If he does not, he is allowed to drive out the rear of his time in the qualification round.

**Start Position.** As a qualifier, the driver is ranked according to his qualifying time—from first, the "Pole Position," to eighth position. He's ready for the baggie.

**The Race is on.** The player waits for the green, pins the accelerator to the floor and lunges off the starting grid. Shifting from low to high, he jockey's for position racing other cars and the clock to finish the lap in the fastest possible time. It's intense, high-speed competition all the way that keeps players coming back to try for higher scores.

If the driver hits one of the other cars on the track or a road sign, an explosion destroys the player's car. The car reappears seconds later. The driver also loses time if he drives off track or through a puddle.

If the player finishes the first lap with time to spare, he is awarded an extended play lap. A maximum of 3 or 4 (operator-selectable) race laps can be driven providing more incentives to sharpen skills.

#### SPECIFICATIONS.

**Controls.** Two-position gear shift, low to high, and a steering wheel are located on the control panel. The driver is also equipped with a foot brake (54-down model only) and accelerator.

**High Score List.** Ranks the top 300 driver scores. The top 100 scores are protected by battery backup.
